Please Note:

- 1) The quality of the finished ceramic photo is completely dependent on the photo you supply to us. The recommended resolution for a digital photo is a minimum of 1 megabyte. Professionally printed photos are very suitable to use and will be returned when the ceramic photo is received.
- 2) Photos cannot and will not be enhanced for the ceramic photo.
- 3) Small professionally printed photos will need to be blown up to make ceramic photos. This will result in a blurry patchy finished ceramic photo.
- 4) Ceramic photo proofs are not supplied. If a proof is required an additional proof fee will apply.
